👤 PROFILE

Full Stack Developer with sales background, seeking a collaborative work environment to contribute to impactful projects.

★ PROJECTS

Covid-19 Tracker

Technologies Used: MERN (Express, React, MongoDB, Node), HTML/CSS3, ChartJS, Material-UI

- Website displaying COVID-19 information regarding recovered, current cases and deaths in over 100+ countries
- Implemented API for daily updates and to create data visualization with ChartJS
- Created reusable React Material-UI components to display information

Gym Bro

Technologies Used: Python, Django, JavaScript, HTML/CSS3, MySQL, ChartIt, Bcrypt, Regex

- Website that allows users to login and select a daily workout, keep track of their accomplishments and view a graphical representation of their workout stats
- Implemented front and back end validation utilizing HTML, JavaScript, Regex and Bcrypt for hashed passwords to enhance security
- Employed RESTful routing with Django and full CRUD functionality with MySQL

The Crepuscolo

Technologies Used: HTML, CSS, JavaScript, Github

- Italian restaurant landing page that is completely responsive and animations
- Created custom key-frames and animation transitions using CSS and JavaScript
- Used media queries to make website mobile friendly while still holding animations
