Additional Skills/Experience:
Agile development, project planning, project manager, communication, leadership, sales, team building

RECENT DEVELOPMENT PROJECTS

Tweet Me | Github
- Full-stack web development using React, Python and Django Rest Framework to create a Twitter inspired single page application where users can login, follow other users, create tweets, like and unlike tweets and retweet other tweets
- Integrated Django Rest Framework to create RESTful API routing, handle user session, MySQL database for creation of users, creating, like, unliking and retweeting tweets and following users
- Created test cases and ran debugging through django rest framework to ensure all API route calls and functionality of the web application between front end and back-end was in good standing

Technologies Used: React, Django Rest Framework, JavaScript, HTML/CSS3, and Bootstrap

Covid-19 Tracker | Live Site | Github
- Full-stack web development using MERN (MongoDB, Express, React, Node.js) to create a completely responsive data visualization website to track COVID-19 information
- Implemented COVID-19 API for real-time updates and to create data visualization with ChartJS
- Created reusable Material-UI components that allowed for easy reusability and functionality

Technologies Used: React, JavaScript, HTML/CSS3, ChartJS, Node.js, Express.js and Material-UI

Gym Bro | [Live Site](#) | [Github](#)
- Full-stack web development using Python and Django to allow users to select a daily workout comprising of curated exercise sets, keep track of their accomplishments and view a graphical representation of their workout stats
- Implemented front and backend validation utilizing HTML, JavaScript, Regex and Bcrypt for hashed passwords to enhance security.
- Employed RESTful routing with Django and full CRUD functionality for multiple models with SQLite database
- Demonstrated data visualization of user workout weight averages with Chart It
- Constructed frontend layout, style and functionality with HTML, CSS, Bootstrap, JQuery and JavaScript

Technologies Used: Python, Django, JavaScript, HTML/CSS3, JQuery, ChartIt, Bcrypt, and Regex

The Crepuscolo | [Live Site](#) | [Github](#)
- Italian restaurant landing page that is completely responsive and has beautiful animations creating an appetizing user experience.
- Constructed aesthetic landing page with HTML, CSS and JavaScript
- Created custom keyframes and animation transitions using CSS and JavaScript throughout website
- Used media queries with CSS to make website mobile friendly while still holding animations

Technologies Used: HTML, CSS, JavaScript, Github
